Description

The **Smart Disinfection and Sanitation Tunnel** is designed to provide maximum protection to people passing through the tunnel in seconds, which can help the community to fight against the **COVID-19**.

This disinfection and sanitation tunnel is prepared in order to sanitize people within 15 seconds from any possible virus, bacteria, mold, fungi and spores around the human body. It can be installed at the entrance of shopping malls, supermarkets, public offices, workshops, factories, pharmacies, schools, airports, hospitals, ports, stations and other public places.

Sanitary and decontamination Tunnels and Gates represent a safe protection and entry for everyone, in particular for those who work in close contact with groups and are therefore at higher risk.

#COVID-19
#disinfection

Features

- Specially manufactured and approved disinfectant is atomized around the human body, while the person moves through the tunnel, without wetting the person
- The atomizers are placed carefully in a manner to superficially cover the person with disinfectant
- This superficial layer of mist will neutralize any SARS-CoV-2 virus stuck to the body and killing 99.99% of viruses, bacteria, mold, fungi, and spores
- Fast assembly, foundation-free and Portable
- Space saving as they are retractable and suitable for permanent or temporary installation

We also have fully customizable tunnels based on clients' requirements, for those who are looking for more options or industrial versions. Our design team will work with you to help you choose the perfect size and accessories to suite your needs.

Benefits

- Ability to disperse all parts of the body from head to toe in the form of spraying while the person moves through the tunnel
- Ability to install in public entrances with large crowds
- High speed misting and high discharge flow at the same time optimal use of disinfectants
- 100% safe for humans even kids, it does not have any chemicals or toxic content
- Tunnels can be linked together or linked to existing structures or buildings

Tools application

The tunnel creates an obligatory passage and is equipped with internal atomizing nozzles that saturate the environment but preventing dispersions. The nebulization system is connected to a control system capable of automatically mixing the sanitizing product at percentages indicated by the manufacturer. Access to the tunnel could be regulated by a traffic light with motion detection. By placing a barrier floor inside the Sanitary Gate, it is possible to sanitize the surface in contact with the ground.

Time duration
3 - 5 sec

Economy

Eco-01

- Dimensions: 1000*500*2100 mm
- 7 nozzles
- 20 liters or 100 Litter 3-layer poly ethylene container
- Automatic activation sensors
- Spraying duration control
- Liquid level indicator for 100 Liters container

Eco-02

- Dimensions: 1000x1500x2100 mm
- 8 nozzles
- Automatic activation sensors
- Spraying duration control
- Hi Power pump
- Liquid floor vacuum pump
- 20-100 liters 3-layer poly ethylene container
- Low liquid indicator
- Automatic power panel
- Shoes sanitizers
- Poly carbonated body
- Artificial grass mat
- LED light

Middle Range

Mid-01

- Dimensions: 1000x1500x2100 mm
- 16 nozzles
- Automatic activation sensors
- Spraying duration control
- Hi Power pump
- Liquid floor vacuum pump
- 100 liters 3-layer poly ethylene container
- Low liquid indicator
- Automatic power panel
- Hand & shoes sanitizers
- 2-layer ACM wall cladding
- Artificial grass mat
- LED light

Mid-02

- Dimensions: 2000x2000x2100 mm
- Tempered glass carbonated body
- Steel structure
- Up to 12 nozzles based on dimension
- Automatic activation sensors
- Spraying duration control
- Hi Power pump
- Liquid floor vacuum pump
- 20/100 litre 3-layer poly ethylene container
- Low liquid indicator (on 100 liter option)
- Automatic power panel
- Artificial grass mat

Luxury

LUXURY - UV & Spray

Disinfection duration: UV 1.5 seconds, fluid 5 seconds

Lux - UV & Spray

- 1000*2000*2100 mm
- 2-layer ACM wall cladding
- 10 nozzles
- 30 W UV lamp
- 100 liters 3-layer poly ethylene container
- Automatic activation sensors
- Spraying duration control
- Hi Power pump
- Liquid floor discharge system
- Liquid level indicator
- Automatic power panel
- Hand & shoes sanitizers
- 2-layer ACM wall cladding
- Artificial grass mat
- LED light

Pedal Sanitizer

Our hands-free sanitizer stand is Ideal solution for high-traffic areas such as shops, hospitals, lobbies, restaurants, residential buildings, hotels, schools, offices etc.

- Portable freestanding design
- Easy to operate with any size of dispenser
- Adjustable Bottle
- It can hold containers of various shapes, sizes and dimensions

Key Feature

- Zero Cross Contamination
- No assembling required
- Sleek & Ergonomic Design
- 500ml Bottle Included
- No Maintenance
- 100% mechanical
- Eco friendly

Specification

- Material: 100% Steel Structure
- Height: 1200 mm | Width: 600 mm | Weight: 30 Kg
